FAQ Pricing EventStudio

All packages offer a unlimited creation of AI-Images during the defined timeperiod.

Event

An event is defined with one up to eight AI-Filters. You can choose template events for the private package or custom created Events when booking the corporate or partner-packages. For private and coporate Packages: A 24 hour access to our WebApp with an unlimited amount of created images in this time period

Standard AI-Filters

We offer Standard Filter in our Webapp, directly useable. We currently offer ~150 Filters. Standardfilter can have different Styles and not each Ai-Filter can be used with every Style.

Station

A Station/sub users defines the number of devices which are allowed to be connected to our webapp at the same time.

Admin Role

The Admin Role gives access to the management functions.

User Management

The user Management allows you to create your own users (a sub-user). A sub-user is a possibility to share your created events and AI-Filters with your customers, but they have their own login data. A sub-user counts like a station.

AI-Filter

An AI-Filter is a defined look and defined style for all kind of persons. It is changing persons into a defined look - useable for all ages, gender etc. We offer Standard an customizable AI-Filters.

Custom AI-Filter

A Custom AI-Filter is a tailored AI-Filter with an existing Style based on your wishes. The custom AI-Filter get created fully inhouse by our the AI-Artists of Eventstation.

Template Event

A template event is an event with up to 8 AI-Filters. The AI-Filters are chosen by the eventstation.ai team and represent a mixture of different styles.

AI-Filter Management

In the Filter management offers you access to all our standard or custom filters based on different styles.

Styles

A Styles is a defined look (e.g. a Superhero in a city) in a specific artistic image style (e.g. realistic). Specific Filter have a specific Styles. We offer different filters for different styles.

Custom AI-Models

A Custom AI-Models is a tailored Model to create a sepcific style or extraordinary poses (where modern AI can have limitations). It can be a look, based on existing material of persons, marketing material, Mascots, brand ambassador or even existing Items your company or client uses or sells.

Custom Event

A custom event is an event with up to 8 AI-Filters. The AI-Filters can be chosen by you.

Event Management

Here you can create your events. A custom created event is only accessible by you and pot. sub users you created. A created event can include an unlimited number of ai-filters from one or multiple styles. Our suggestion is to use between two up to eight AI-Filter per event & day.

A Custom AI-Models is a tailored Model to create a sepcific style or extraordinary poses (where modern AI can have limitations). It can be a look, based on existing material of persons, marketing material, Mascots, brand ambassador or even existing Items your company or client uses or sells.

Virtual Photbooth

A Virtual Booth means, that you don't need a Photbooth during your Event. Your clients can use it with their phones by scanning a QR-Code. Photos can be existing photos from the gallery (Upload-Function) or by using their phone cameras.

For real Events: Maker it accessible by putting a QR-Code in your Venue, which you can create with any existing QR-Code-Generator (based on the Link of the Application)

For virtual Events: Share the Hyperlink with your audience connected to an Icon on your website or via an E-Mail to share it with your clients.

Physical Photbooth

A Photbooth can be any kind of Photbooth-System

For real Events: Maker it accessible by putting a QR-Code in your Venue, which you can create with any existing QR-Code-Generator (based on the Link of the Application)

For virtual Events: Share the Hyperlink with your audience connected to an Icon on your website or via an E-Mail to share it with your clients.
